

Center for Industrial Asset Management, CIAM

CIAM is a university-industry collaborative competence-centre within Industrial Asset Management. It is also a knowledge-based cluster for research & development, experience sharing, learning, and education based in the Rogaland region, the Oil capital of Norway.

CIAM provides a collaborative platform between University of Stavanger, Research & Development institutes, and Industrial partners. It aims at developing core competencies, exploring innovative solutions, and providing the know how to improve existing practices to enhance value creation and competitiveness.

All within the title:

Asset Engineering and Management

VISION⁺ 2014

Asset Engineering and Management

**SUSTAINABLE ASSET MANAGEMENT
FOR THE NEXT DECADE**

1-2 April 2014,
Stavanger, Norway

www.vision-aeam.com

CIAM organizes a two-day conference on Asset engineering and management promoting state-of-the-art practice and R&D. This is meant to be an intellectual meeting place for practitioners, academics and policy makers to drive innovation within Asset engineering and management.

Main Topics

- » Sustainable management of assets in infrastructure
- » Competitiveness in a high-cost country
- » Advanced technologies

Keynotes

- » Ageing infrastructure in Sendai
- » The cost of being too fast
- » Visions related to nanotechnology and graphene

Subtopics

- » Ageing infrastructure
- » Lean project management
- » Lean production
- » Outsourcing and split location management
- » Increasing effective tool time
- » Advanced sensor technology
- » Nano-material technology
- » Simulation modeling
- » Asset integrity beyond the Polar Circle

Important dates

Early registration: 31 January, 2014
Late registration: 21 March, 2014
Conference dates: 1-2 April, 2014

Presentations, sponsorship and marketing
