Open Data and Digital Innovation

16 October 2014 – Kraków, Poland

The Digital Baltic Project would like to invite key actors and stakeholders to a one-day conference in the field of Open Data and Digital Innovations.

The Digital Baltic Project aims at promoting digital innovations in Open Data and Public Sector Information (PSI) from a citizen perspective in the Baltic Sea Region. Digital Baltic is co-funded by the Swedish Institute and consists of main partners and supporting partners from Sweden, Estonia, Lithuania, Norway, Poland and Denmark.

With this background, the Digital Baltic Project would like to invite you to an inspiring day exploring Open Data and Digital Innovation. Through this conference we hope to meet new partners for possible joint projects on the topic of open data and digital innovation. During this meeting you will learn:

- What is Open Data
- Examples of using Open Data in the digital world
- Digital Agenda – practical approach to creating a digital single market
- Good practice from Europe:
  - ➢ Hack for Sweden – how Sweden plans to revolutionize the use of open data
  - ➢ How Estonia became e-Estonia
  - ➢ Open Data – how do companies benefit
  - ➢ IT Security and Open Data– why should we care
  - ➢ How to engage citizens in ICT innovation process
  - ➢ What are the results of the Digital Baltic Project

The partnership of the Digital Baltic Project looks forward to seeing you in Kraków on 16th October.
